

Passionate software developer eager to contribute to front-end development projects that emphasize design and user experience. Seeking opportunities to apply and grow my skills in creating engaging, responsive interfaces that enhance user interaction.

Skills

- **Languages:** C, C++, JavaScript ES6, HTML, CSS,
- **Libraries and Frameworks:** React.js, Ant Design, Tailwind, Bootstrap
- **Tools:** Git/GitHub, API Integration
- **Soft Skills:** Team building, communication, punctuality, self-motivation

Experience

* Junior Software Developer

April 2024 - September 2024

Tech Matys, Dehradun (Remote)

- **Student Management System (SIS):** Leading the front-end design improvements using React and Ant Design for a responsive and intuitive user experience.
- Developed and integrated API functionalities to perform CRUD operations, ensuring seamless data flow between front-end and back-end systems.
- Implemented Learning Management System (LMS) features using Moodle, managing user roles and permissions for teachers and students.
- Designed and developed modules for creating grades, courses, classrooms, and student submission forms, efficiently saving data through APIs.

Education

Master of Computer Applications

Tula's Institute, Dehradun | 2021-2023

- Focused on computer science fundamentals, data structures, and algorithms.
- Actively participated in tech events and college festivals.

Bachelor of Computer Applications

Swami Darshanand Institute of Technology, Haridwar | 2019-2021

- Completed courses in data structures, algorithms, computer architecture, operating systems, and software engineering.

CERTIFICATIONS

- **TCS iON Career Edge – Young Professional**
Career preparedness course designed to equip youth with core employability skills.
- **Mastering Data Structures & Algorithms using C and C++ (Udemy)**
Developed strong problem-solving skills and the ability to create logical solutions.
